

ON-SITE SEO CHECKLIST

A practical pre-publish review for web pages and blog posts

PAGE OR POST TITLE

PRIMARY KEYWORD / TOPIC

1. SEARCH INTENT & KEYWORDS

- ☐ Define the primary audience and the question this page answers.
- ☐ Choose one primary keyword or topic for the page.
- ☐ Confirm the page format matches the likely search intent.
- ☐ Identify a few closely related terms to use naturally.
- ☐ Review competing results and note how this page adds unique value.

2. CONTENT QUALITY

- ☐ Write primarily for people, not search engines.
- ☐ Answer the main question clearly near the beginning.
- ☐ Use original, accurate, and useful information.
- ☐ Support claims with credible sources when appropriate.
- ☐ Demonstrate experience, expertise, authority, and trust.
- ☐ Break long text into short paragraphs, headings, and lists.
- ☐ Proofread for clarity, grammar, and outdated information.

3. PAGE TITLES, HEADINGS & METADATA

- ☐ Write a unique, descriptive title tag for the page.
- ☐ Include the primary topic naturally in the title tag.
- ☐ Write a concise meta description that encourages a click.
- ☐ Use one clear H1 that accurately describes the page.
- ☐ Organize sections with logical H2 and H3 headings.
- ☐ Create a short, readable, descriptive URL slug.

4. LINKS, IMAGES & ACCESSIBILITY

- ☐ Add useful internal links to related pages on the site.
- ☐ Use descriptive anchor text instead of vague phrases like click here.
- ☐ Check every internal and external link for errors.
- ☐ Compress images and use an appropriate file format.
- ☐ Give each meaningful image concise, descriptive alt text.
- ☐ Confirm text size, color contrast, and link labels are readable.

5. TECHNICAL & FINAL REVIEW

- ☐ Preview the page on a phone, tablet, and desktop.
- ☐ Check that the page loads quickly and does not shift while loading.
- ☐ Confirm the page uses HTTPS and has no browser security warnings.
- ☐ Make sure search engines can crawl and index the page.
- ☐ Add relevant schema markup when it genuinely helps interpretation.
- ☐ Preview the search snippet and social sharing appearance.
- ☐ Set a reminder to review rankings, traffic, clicks, and conversions.
